Re: TeleConex, Inc.
Docket No. ~~02-00885~~ 02-00904

Dear Mr. Waddell:

Pursuant to a data request from staff, TeleConex, Inc. ("TeleConex") provides the following information:

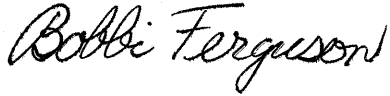

1. Toll Dialing Parity Plan for Applicants Providing Voice Grade Service.

See Exhibit I attached.
2. Sources for funding the Tennessee network, equipment, UNEs, cash, loan commitments, vendor credits, letters of credit etc.
 - a. There is no capital investment required in Tennessee for either network, equipment, or UNE-Ps. TeleConex will have no facilities in the State of Tennessee, as stated in its application and the UNE-P platform will allow TeleConex to purchase services from its underlying carriers at a lower cost that the company does as a reseller.
 - b. No funding will be needed to provide the UNE-Ps. TeleConex is profitable, and any required capital will be self funded from company operations.

Under separate cover, TeleConex is providing the information requested regarding cash flows, executive management, and pre-filed testimony.

Please acknowledge receipt of this filing by returning, file-stamped, the extra copy of this cover letter in the self addressed stamped envelope provided for that purpose. Inquiries regarding this filing should be directed to me at (205) 330-1703 or via email to bobbi@visiology.com. Your assistance in this matter is greatly appreciated.

Sincerely,

A handwritten signature in cursive script that reads "Bobbi Ferguson".

Attachment I

Toll Dialing Parity Plan

TeleConex Toll Dialing Parity Plan

Methodology: TeleConex will provide full 2-PIC (intraLATA and interLATA) dialing parity, allowing TeleConex customers or its voice grade postpaid services to pre-subscribe to one carrier for all interLATA calls and to the same or another carrier for all intraLATA toll calls. One interLATA IXC and one intraLATA IXC may be selected for each trunk. All central offices owned by TeleConex will be equipped to provide this service.

Availability: TeleConex will provide full 2-PIC dialing parity in major metropolitan areas of each BellSouth/Sprint/United LATA in which TeleConex provides service and where TeleConex's underlying carrier(s) can provide such service to TeleConex.

Subscriber Practices: TeleConex will inform its new postpaid voice grade local service customers of the dialing parity feature, and provide customers a randomly ordered list of carriers available to them in their geographic area when the customer first subscribes to service. The list of intraLATA toll carriers will be presented in a competitively neutral manner. Customers who do not choose an intraLATA toll carrier will be identified within TeleConex's system as a "NO PIC" and will not automatically be defaulted to a carrier. Customers identified as "NO PIC" within TeleConex's system will be required to dial 10XXX or another carrier access number such as a toll free number to place intraLATA toll calls until they make an affirmative choice for an intraLATA toll carrier. PIC change charges and waiver periods will be addressed in TeleConex's tariff to be filed prior to offering voice grade postpaid local services in Tennessee.

Carrier Practices: Any interexchange carriers that wish to offer intraLATA toll services to TeleConex postpaid local customers must establish direct interconnect of its network with that of TeleConex's underlying carrier in accordance with the requirements of the underlying carrier. Other Access Service request ("ASR") requirements will be available from the TeleConex's Carrier Customer Service Center.

Proposed Implementation Schedule: TeleConex will implement dialing parity prior to offer postpaid voice grade local services.

Notification: TeleConex will provide notice to its subscribers of the availability of intraLATA toll dialing parity at the time they request new telephone service, provided at least one ASR has been received from an alternative carrier. TeleConex will notify all Feature Group D carriers operating in Tennessee prior to offering service.

Access to Operator Services and Directory Assistance: Nondiscriminatory access to other carriers of telephone numbers, Operator Services, and Directory Assistance will be available through the customer's local exchange carrier or interLATA carrier.

Anti-Slamming Procedures: A charge will be established for "slamming" or unauthorized PIC charges submitted by carriers or TeleConex for end-user customers. TeleConex will be subject to the rules related to slamming as indicated in the Tennessee Regulatory Authority Rule 1220-4-2:56, Sections (2)-(6).

TRA and FCC Rules: TeleConex will comply with all rules of the FCC and TRA regarding IntraLATA toll dialing parity
